

Year 12 course – Applied ICT

The Applied ICT AS is a new vocational course with a high practical focus. In year 12 the students complete 2 coursework units and 1 practical exam. This is a full points scoring course.

Unit 1 – Life in the Information Age	Students learn about the impact of ICT across the personal, social and professional lives of people today. They also investigate the impact of the internet and the Digital Divide. Their work is presented as a multi-media ebook.
Unit 2 – The Digital Economy	Students investigate how a transactional web site works and how data flows between departments of the business. Their work is presented as an eportfolio.
Unit 3 – The Knowledge Worker	Students analyse a business problem, use a complex spreadsheet model to identify a possible solution, and present this to the management team of the business. This work is completed as a 2 ½ hour practical

exam.
