

Year 13 course – Applied ICT

The Applied ICT A2 is a new vocational course with a high practical focus. In year 13 the students complete 2 coursework units and 1 practical exam. This is a full points scoring course.

Unit 8 – Managing ICT Projects	Students structure, plan and manage an ICT project. They learn many Project Management skills that are useful outside of ICT. Their work is presented as an eportfolio.
Unit 10 – Using Multi-Media Software	Students analyse, design and develop a multi-media resource for a member of staff in school. They learn how to create and edit both sound and video to present information. Their work is presented as an eportfolio.
Unit 7 – Using Database Software	Students analyse a business scenario from which they design, build and test a complex database solution. This work is completed as a 10 hour practical exam.
