

OAKWOOD PARK GRAMMAR SCHOOL

GCSE

COURSE INFORMATION

AND GUIDANCE

2021-2023

ART AND GRAPHICS SPECIALISMS

Subject Leader Art: Mr A. Edwards

Examination Board: AQA Syllabuses: 8202 & 8203

Why Study Art?

When most students think about studying Art or Graphics they only see two possible pathways, either that of the traditional artist or that of a graphic artist. However, these are two of only a vast number of jobs that art could possibly lead to.

But firstly, it is interesting to consider some other information when thinking about Art and Graphics. Did you know that a recent article in the Guardian suggested that artists had one of the future proof jobs? It stated that "art will continue to change and evolve with technology, not disappear" and that possibly one of the big new sectors of work, augmented reality could provide work for the next generation of artists. Could you be the next **Digital Architect** (Designs a range of virtual buildings for advertisers to market their products and services) or perhaps an **Avatar Design-Security Consultant** (designs, creates and protects the virtual you)? Secondly, a charitable organisation called NESTA has projected that there will be 1 million new jobs created between now and 2030 in the creative industries, all of which Art and Graphics can be vital for. Thirdly, the Arts Council has just produced research suggesting that creative thinking is the future for the job market and Art and Graphics is instrumental in helping develop these skills.

So, moving into a future having taken a specialist creative subject could be a major advantage in the future job market. But what jobs are open to you? Probably more than you think. For example:

Graphic designers, Architects, Multimedia artists and animators, Interior designers, Landscape Architects, Curators, Museum technicians and conservationists. What's interesting about these art-based jobs is that the Huffington Post lists these as careers with the brightest futures with increased growth since 2008.

This is just the tip of the iceberg, you could be an illustrator designing the latest album covers, a game designer creating the latest worlds for computer games, set designer, or costume designer, editor of films, film director, camera man, photographer the list is almost endless but the starting point is the same. Art and Graphics gives you the foundation, knowledge and choice to progress in these pathways.

Students have a choice of two Art options – Fine Art or Graphic Communication.

Fine Art Specialism

In Fine Art we explore a range of mediums and processes, these include drawing, painting, sculpture, printmaking, photography, digital work. You will also use a range of mediums including pencil, pen, felt-tip, colouring pencil, oil pastels, charcoal, paint, clay, cardboard, breeze block etc. The projects are open ended and require a creative approach. Current projects explore Fragmentation and portraits. You need to be able to develop your own ideas and be able to creatively and imaginatively come up with ways to explore your topic. Independence is key as is good time management. You will often be expected to work at lunch or afterschool to complete work and develop your project.

You must be willing to consider new ways of working and thinking outside of the box to create work that is personal and inventive. But above all you must have a passion for the subject.

Graphic Communication Specialism

In Graphics, you will work from design briefs which require a specific outcome that is tailored to a theme or audience. Briefs explore a range of topics, including, music and restaurants. These design briefs often require you to be more creative and work around possible restrictions and to imaginatively problem solve.

You will be expected to work with a range of processes including drawing, painting, sculpture, photography, and digital work. In Graphics, working creatively with a range of materials including pencil, colouring pencil, ink, paint, lino, illustrator and Photo-shop helps you to develop ideas and skills. It should be noted that students need a high level of skill with technical drawing to succeed at Graphics.

Being able to develop your own ideas and creatively come up with new ways to explore your topic is key, as is independence and good time management. You will often be expected to work at lunch or afterschool to complete work and develop your project. You must be willing to consider new ways of working and thinking outside of the box to create work that is personal and inventive. But above all you must have a passion for the subject,

Assessment

For Both Fine Art and Graphics assessment is the same. There are 4 Assessment objects, each objective is worth 24 marks.

- **A01 - Develop** – This Assessment Objective is primarily concerned with the development of the project and the links you can make with your own work to that of artists and designers.
- **A02 – Explore** – This Assessment Objective is about experimenting with materials and processes, reviewing and refining of your ideas and developing your work

- **A03 – Record** – This Assessment Objective focuses on the drawing, painting, sculpture etc., and the quality of it, as well as your ability to annotate your work effectively.
- **A04 – Present** – This Assessment Objective is about your final intention or piece, the quality of it and the connections you have made with other artists.

Meeting the assessment objectives will be a continual process beginning from day 1 of the course. It is key to remember that every piece of classwork and homework goes to helping develop your portfolio which is graded in the final assessment in Y11. Assessment objectives are not really ever tackled singularly but rather collectively as the course progresses.

The final grade in Art and Graphics is made up of two marks:

- 60% from the coursework grade. This is work completed from September in Year 10 to Christmas in year 11. It is a major body of work spanning a range of projects and over many pieces of work.
- 40% comes from the exam. The exam is run slightly differently to most subjects. Students are given an exam paper in January and are given a range of starting points. They then have a set amount of time to prepare developmental and experimental work, this is referred to as the "prep period" and lasts a number of weeks. During this period the teacher helps and guides the students allowing them to develop a final piece idea. At the end of the prep period a 10 hour exam is sat over 2 days in which students complete a final piece in exam conditions without assistance.
- Syllabus details may be found at www.aqa.org.uk

Computer Science

Subject Leader Computer Science: Mrs F Ramkhalawon and Miss V Rowe

Exam Board: OCR

Syllabus Name: Computer Science (9-1) - J277

The qualification will build on the knowledge, understanding and skills established through the Computer Science elements of the Key Stage 3 programme of study. The content has been designed not only to allow for a solid basis of understanding but to engage learners and get them thinking about real world application.

Aims and learning outcomes

- understand and apply the fundamental principles and concepts of Computer Science, including abstraction, decomposition, logic, algorithms, and data representation
- analyse problems in computational terms through practical experience of solving such problems, including designing, writing and debugging programs
- think creatively, innovatively, analytically, logically and critically
- understand the components that make up digital systems, and how they communicate with one another and with other systems
- understand the impacts of digital technology to the individual and to wider society
- apply mathematical skills relevant to Computer Science.

Component 01: Computer systems

Introduces students to the central processing unit (CPU), computer memory and storage, data representation, wired and wireless networks, network topologies, system security and system software. It also looks at ethical, legal, cultural and environmental concerns associated with computer science.

This component will assess:

- 1.1 Systems architecture
- 1.2 Memory and storage
- 1.3 Computer networks, connections and protocols
- 1.4 Network security
- 1.5 Systems software
- 1.6 Ethical, legal, cultural and environmental impacts of digital technology

This component is an externally assessed written examination representing 50% of the total marks. The examination lasts 1 hour 30 mins.

Component 2: Computational thinking, algorithms and programming

Students apply knowledge and understanding gained in component 01. They develop skills and understanding in computational thinking: algorithms, programming techniques, producing robust programs, computational logic and translators.

This component will assess:

- 2.1 Algorithms
- 2.2 Programming fundamentals
- 2.3 Producing robust programs
- 2.4 Boolean logic
- 2.5 Programming languages and Integrated Development Environments

This component is an externally assessed written examination representing 50% of the total marks. The examination lasts 1 hour 30 mins.

Practical Programming

Students will be required to undertake programming tasks during their course of study which allows them to develop their skills to design, write, test and refine programs using a high-level programming language, at OPGS we are currently using Python. Students will be assessed on these skills during the written examinations, in particular component 02.

Possible Enrichment Activities

Cyber Discovery, Codewars, iDEA, Bebras Challenge, Bafta Young Game Designer, Raspberry pi club, Lego Mindstorms robotics, 'KODU' from Microsoft Research and codeacademy.org.

Website:

<https://www.ocr.org.uk/qualifications/gcse/computer-science-j277-from-2020/>

DESIGN & TECHNOLOGY

Subject Leader Design and Technology: Mr S. Peacock
Exam Board AQA
Design and Technology 8552

The course consists of two units; Unit 1 is a 2 hour written exam on 'Knowledge and Understanding' of Design and Technology and Unit 2 is a design portfolio and practical make activity. The Non-Exam Assessment (coursework) is completed in Year 11.

Unit 1	Unit 2
Knowledge and Understanding. Examination 50% of overall mark	Creative Design and Make. Non-Exam Assessment 50% of overall mark
A 2 hour exam which tests the student's knowledge on Core technical principles, Specialist technical principles and Designing and making principles.	Substantial design and make task. Students will produce a prototype and a portfolio of evidence.

Throughout Years 7, 8 and 9 you will have been involved in a few different projects based on the fundamental skills used in D & T; drawing, sketching, CAD, researching, producing reports, investigating ideas, and designing and making products in a variety of materials. If you enjoyed the challenges this presented, and received good project marks and monitoring grades, then you should consider D & T as a GCSE option.

Designing and Making:

The Design and Technology GCSE will require you to produce a portfolio of work based around one of the exam boards set briefs. The briefs are not released by the exam board until June in Year 10. You will have to analyse the task, carry out a range of primary research, design, develop and plan the manufacture of the product you wish to make. This will be completed mainly on computers and you will learn how to use '3D Solidworks', a 3D modelling software, so good ICT skills will benefit you. You will also be taught how to use other graphics software such as 'Techsoft 2D Design' and 'Adobe Photoshop'.

You will also need to manufacture a working prototype of the product you design and develop. This will allow you to get creative in the workshops and learn about a range of machinery and materials.

Examination:

'Knowledge and Understanding' is a 2 hour exam in the summer of Year 11, in which you will be tested on what you know about materials, tools and equipment, industrial and commercial processes, analysing and designing products, and the use of computers in designing and making. There is also a section which includes questions on sustainability, renewable energy and minimising waste – all very topical issues.

The exam also contains Maths and calculation questions – working out volumes and areas, reading data and calculating costs for manufacture.

Should you study this subject?

Design and Technology is a big coursework based subject and you will be expected to work hard and meet the strict deadlines during design and manufacture. The changes to exam specification means that you will now only have 35 hours to complete the design and make activity in Year 11 only.

You will be expected to work independently at home and attend workshop sessions after school.

You should enjoy designing, being creative and working with the machines and materials in the workshop. It will also help you if you are artistic and have good drawing skills as well as strong ICT knowledge.

This new specification has strong links with Maths and Science.

This subject is important if you are thinking about pursuing a career in any field of design or engineering. This includes engineering, product design, architecture or any of the construction trades.

Contact: speacock@opgs.org

AQA GCSE Design and Technology web link:
<http://www.aqa.org.uk/subjects/design-and-technology/gcse/design-and-technology-8552>

GCSE DRAMA

Subject Leader Drama: Mr S. Baker
Exam Board: Pearson/Edexcel

Drama is a very popular and oversubscribed subject. Students choosing this option would usually already be involved with the extra-curricular programme at school and/or external theatre schools/clubs.

Students are expected to dedicate themselves to the course, the course demands and the expectations of the Drama Department. This involves regular rehearsals at lunchtimes, after school and weekends. The required commitment and rehearsal time supports the academic and performance based expectations of the GCSE.

Component 1: Devising

NEA

40% of the qualification – 60 marks

Content overview

- Create and develop a devised piece from a stimulus
- Performance of this devised piece or design realisation for this performance.
- Analyse and evaluate the devising process and performance
- Performer or designer routes available.

Assessment overview

- There are two parts to the assessment:
1) a portfolio covering the creating and developing process and analysis and evaluation of this process (45 marks)

2) a devised performance/design realisation (15 marks)

Component 2: Performance from Text

NEA

20% of the qualification – 48 marks

Content overview

- Students will either perform in and/or design for two key extracts from a performance text.
- Performer or designer routes available.

Assessment overview

- Externally assessed by visiting examiner.

Students should also be fully aware that textual analysis and written assessments form up to 70% of the GCSE qualification. Drama is not an easy option. It takes time, dedication, commitment and resilience to be successful.

- Performance/design realisation covering both key extracts is worth 48 marks.

Component 3: Theatre Makers in Practice

Written examination: 1 hour 45 minutes

40% of the qualification – 60 marks

Content overview

- Practical exploration and study of one complete performance text
- Live theatre evaluation

Assessment overview

Section A: Bringing Texts to Life

- 45 marks
- This section consists of one question broken into six parts (short and extended responses) based on one extract from the chosen performance text.
- Performance texts are not allowed in the examination as the extracts will be provided.

Section B: Live Theatre Evaluation

- 15 marks
- This section consists of two questions requiring students to analyse and evaluate a live theatre performance they have seen.
- Students are allowed to bring in theatre evaluation notes of up to a maximum of 500 words.

It is important to note that students will be expected to visit the theatre (usually in London) at least six times during the two years at an approximate cost of £35.00 per trip.

ENGLISH

Subject Leader English: Ms R George
English Language AQA 8700
English Literature AQA 8702

The English course, which is compulsory at Key Stage 4, provides **two separate GCSE qualifications** from an integrated programme of study. All students are entered for both subjects at the **Higher Tier**. The course develops:

- Detailed knowledge and understanding of fiction including Shakespeare, (Romeo and Juliet), a selection of poetry, a play (An Inspector Calls) and a novel (The Strange Case of Dr Jekyll and Mr Hyde) as well as a range of non-fiction texts. We think you will find the texts and subjects for study interesting and the class activities thought-provoking and helpful.
- Language skills, which involve analysis, argument, persuasion, imagination, explanation and exploration in speech and in writing.

Both **skills** and **knowledge** are assessed through **terminal examinations**:

- **English Language:** 2 examination papers (100%)
Paper 1- Explorations in creative writing and reading (50%)
Paper 2- Writers' viewpoints and perspectives (50%)
Non examination Spoken Language (an assessment aimed to allow students to demonstrate their speaking and listening skills)
- **English Literature:** 2 examination papers (100%)

Paper 1- Shakespeare and Jekyll and Hyde (40%)
Paper 2- Modern texts and poetry (60%)
- **Spoken Language** (Non exam assessment)

The aim of the assessment is to allow students to demonstrate their speaking and listening skills by:

- giving a presentation in a formal context
- responding appropriately to questions and to feedback, asking questions themselves to elicit clarification
- using spoken Standard English.

The English GCSE is an interesting, engaging and exciting course, giving opportunities to study a wide variety of texts as well as developing your own skills in creative writing.

High order skills and excellent results in English at KS4 are crucial, whatever your chosen path after GCSE; the skills you acquire on these courses are life skills.

The analytical skills and special interests that we hope you develop also provide you with an excellent foundation for A levels and Higher Education. In particular, good results provide access to one or more of the rigorous, motivating and prestigious A level subjects we offer in English as well as in the Humanities and Social Sciences.

Nevertheless, wherever your specialist areas and strengths lie, you will need to be a good communicator.

We believe that you will enjoy the course and with a positive, mature attitude to your learning and a good work ethic, you can succeed at the highest level.

Please follow the links below for an overview of the courses, at a glance.

Ms C Davies (KS3 Lead for English) cdavies@opgs.org

FRENCH

Subject Leader: Ms P Roux
Examination Board: Eduqas

Overview

In year 9 students have had the opportunity to overview the 12 themes assessed by the exam board at GCSE level. Students have been learning the skills needed for the exams in year 11 as well as studying the foundation content of the specification. Students are asked to produce extended written and spoken language pieces as well as understanding long reading and listening passages based on the basic language introduced for each topic. At the same time, they have to translate long simple texts into French and English.

At the end of the year they have a clear idea of the topics for GCSE and how they will be assessed at the end of year 11. As part of the full GCSE course in year 10 and 11 they will be getting a deeper understanding of the three themes covered by the specification. The three themes are:

1. Identity and culture
2. Local, national (home, charity work, health) international and global areas of interests (charities, health, tourism)
3. Current and future study and employment

Structure of the assessment

Paper 1: Speaking

- Non-exam assessment
- 25% of GCSE

Communicating and interacting effectively in speech for a variety of purposes

Foundation Tier and Higher Tier

The format is the same at Foundation Tier and Higher Tier, but with different stimulus questions, materials and preparation time.

- Role-play
- Photo card
- General conversation

Paper 2: Listening

- Written exam
- 25% of GCSE

Understanding and responding to different types of spoken language

Foundation Tier (40 minutes, 40 marks) and Higher Tier (50 minutes, 50 marks)

Questions in English, to be answered in English or non-verbally, or questions in French, to be answered in French or non-verbally

Paper 3: Reading

- Written exam
- 25% of GCSE

Understanding and responding to different types of written language

Foundation Tier (60 minutes, 60 marks) and Higher Tier (75 minutes, 60 marks)

Students respond to questions in English, in French or non-verbally and translate from French into English.

Paper 4: Writing

- Written exam
- 25% of GCSE

Communicating effectively in writing for a variety of purposes

Foundation Tier (75 minutes, 50 marks)

Students produce responses to several stimuli including photos, short passages, and translations and structured writing tasks.

Higher Tier (90 minutes, 60 marks)

Students produce several written passages including a structured writing task, an open-ended writing task and translation from English into French.

Contact proux@opgs.org

It is essential for students to discuss their GCSE language choice with their teacher.

GEOGRAPHY

Subject Leader Geography: Mr J Baird
Exam Board: Edexcel A, Syllabus Code: Geography 1GAO

Why choose GCSE Geography?

The course will enable you to gain an understanding of global and modern geographical issues. It will help you to develop analytical and interpretation skills that can be used in further education and your career. Geography is well known as a subject that links to all other subjects in the curriculum so a GCSE in Geography is a stepping stone to a whole range of opportunities. The skills you develop can lead to a wide range of careers in areas such as engineering, environmental management, ICT, journalism, media, marketing, accountancy and business management.

Is Geography the right subject for you?

Ask yourself what you enjoy about the study of Geography. Do you want to:

- Learn more and understand about the rapidly changing world that you live in?
- Learn through investigation and doing as well as listening and reading?
- Develop transferable skills that will help you in other areas e.g. research and IT?
- Undertake individual investigations on contemporary topics?

What will you learn?

The world is always changing. Geography gives you the chance to learn about these changes. Through the GCSE Geography syllabus, you will develop a 'sense of place' by looking at the world around you on a local, regional and global scale. You will examine a range of natural and man-made environments and learn about some of the processes which affected their development. You will also look at the ways in which people interact with their environment and the opportunities and challenges an environment can present, thereby gaining a deeper insight into the different communities and cultures that exist around the world.

There are 3 components which will be studied over the three years and will stretch and challenge your thinking.

Component 1: The Physical Environment

Students will cover issues such as:

- The physical geography of the UK

- A study of both coastal and river landscapes and processes, as well as management against coastal erosion and river flooding
- Weather hazards, e.g. tropical cyclones and drought
- Causes and consequences of climate change
- Characteristics of global ecosystems, such as tropical rainforests, and their management

Component 2: The Human Environment

Students will cover issues such as:

- A study of a UK city (Birmingham) and a city in a developing/emerging country (Sao Paulo) to look at its characteristics and how its changed over time
- Causes and consequences of migration
- How the problems of urban areas, such as over-crowding, can be solved
- The reasons why we live in an unequal world
- The management of natural resources, such as energy and water

Component 3: Geographical Investigations: Fieldwork and UK challenges

Students will cover issues such as:

- The pressure on growing populations on the UK's ecosystems
- The costs and benefits of developing brownfield and greenfield sites
- River management in the UK
- Impacts and response to climate change on the UK
- Questions relating to their fieldwork experience

How will you be assessed?

All students will sit the following three exam papers:

- Paper 1 – 1 hour 30 minutes – 37.5% of total qualification – Students answer questions on Component 1: The Physical Environment
- Paper 2 – 1 hour 30 minutes – 37.5% of the total qualification – Students answer

questions on Component 2: The Human Environment

- Paper 3 – 1 hour and 30 minutes – 25% of total qualification – Students answer

questions on Component 3: Geographical Investigations: Fieldwork and UK challenges

HISTORY

Subject Leader History: Miss A Aldous
Syllabus: Edexcel History Specification

The History Edexcel course with some excellent historical 'enrichment' opportunities.

Summary of Edexcel History GCSE: all assessed at end of Y11.

Paper 1: Thematic study and historic environment

*Written examination: 1 hour and 15 minutes
30% of the qualification*

**Warfare and British society, c1250–present (thematic study)
and London and the Second World War, 1939–45 (historic environment)**

Paper 2: Period study and British depth study

*Written examination: 1 hour and 45 minutes
40% of the qualification*

**Superpower relations and the Cold War, 1941–91 (period study)
and Early Elizabethan England, 1558–88. (British depth study)**

Paper 3: Modern depth study

*Written examination: 1 hour and 20 minutes
30% of the qualification*

Weimar and Nazi Germany, 1918–39.

In **Year 10** students will focus on the British depth study: **Early Elizabethan England**. This includes the situation when Elizabeth became Queen and her rule – how did she maintain the image of the 'Virgin Queen'? Why did grammar schools develop? Plus, religious change and the international response including the Spanish Armada. These big debates will need a base of knowledge and careful explanation. This links to students' work on Spain and the New World in Year 9 as students also learn about colonies in North America and the Spanish Armada. It can also offer a bridge to future A-Level study, should students wish to continue with History in the future – most KS5 qualifications now have a Medieval or Early Modern British History module.

Students will also study the **Superpower relations and Cold War, 1941-91** period study This provides continuity and stretch and challenge by building on Year 8 and Year 9 work on the two World Wars: looking at a range of events from the post-war

conferences, Hungarian Uprising, Cuban Missile Crisis, and the collapse of the USSR. Students will have a strong understanding of international developments which have shaped our world today. Students will explore how close the world came to nuclear war, why the arms race developed, how the Berlin Wall was constructed and how it fell decades later. On both units there will be assessments with GCSE-style questions, revision support and frequent shorter recall quizzes.

In Year 11 students will study **Warfare and British society topics, including London and the Second World War**. This GCSE topic will be taught using clips, maps, 'regular' textbook and worksheet materials and students should find tracking one topic through this long time period very rewarding. We will be studying the nature and experience of warfare across this period, including the development of weapons technologies, strategies and the impacts on communities. From Norman archers to the Battle of Agincourt, from the Civil War battle at Naseby to the aerial raids of London during the Second World War, this will be a rewarding and interesting topic, giving students great insight into the development of warfare over time. This builds on the Year 9 Ypres Enrichment Day and many students have a family link to the Blitz or evacuation and find this very interesting.

For the **Weimar and Nazi Germany** topic students evaluate how Germany recovered from the First World War, how the Nazi dictatorship was established and why this brought Europe to another destructive war. How did Germany deal with defeat and a punishing treaty? Why did their inter-war leader win the Nobel Prize? How did the Nazis develop a popular programme and create a dictatorship? Again, a mixture of clips, film extracts, debates and primary sources: posters, police reports, letters and more, will help students develop their sources skills. Assessments in Y11 will include full exam practices as well as our routine quizzes and termly assessments.

History GCSE is an excellent course for students who are curious about the past,

enjoy their History lessons and have a love of finding out more about how things used to be. We offer other opportunities for extension and challenge throughout the course. We also run support sessions with A-Level History students offering friendly advice to GCSE students about revision techniques. Students interested in politics and law also find History very relevant as there are always many links to events happening in the news and current affairs today.

Contact: aaldous@opgs.org

MATHEMATICS

Subject Leader Mathematics Mr J. Rhys

KS4 Mathematics Coordinator Mr P. O'Neill

Exam Board: Pearson Edexcel GCSE 9-1 (1MA1) Higher Tier

Mathematics is a compulsory subject at KS4 and students will be following the programme of study for Edexcel Higher GCSE Maths 9-1. All students will follow the same course and take the Higher Level exam. The grades available range from 4 to 9 with 9 being the highest.

What will I study?

**PEARSON EDEXCEL GCSE 9-1 (1MA1)
HIGHER TIER**

Assessment objectives

AO1: Use and apply standard techniques

AO2: Reason, interpret and communicate mathematically

AO3: Solve problems within mathematics and in other contexts

Content

1. Number
2. Algebra
3. Ratio, proportion and rates of change
4. Geometry and measures
5. Probability
6. Statistics

During Years 7 & 8, students are taught in their form groups. In Year 9, students will be placed in a group which is deemed most appropriate for their ability. Setting is based upon end of year exams and results from ongoing assessment during Years 7 and 8.

In Years 10 and 11 all students will be taught Maths at the same time and students will be set in groups based on exam and assessment results throughout Yr. 9.

How will I be assessed?

The GCSE is assessed by three 1.5 hour examination papers with all three papers assessing the full range of the syllabus at the end of the course. The first paper does not allow the use of a calculator, whilst the other 2 papers do.

All students will be entered for their exams in the May/June of Year 11.

The top set in Maths will also follow an additional higher Maths qualification in order to stretch the most able and better prepare the students for A – Level Maths.

Contact: jrhys@opgs.org

poneil@opgs.org

MEDIA STUDIES

Subject Learner Media: Miss. M Goodhew
Exam Board Eduqas (WJEC) C680QS

What does the course involve?

This is a two-year course in which you will study key media concepts of genre, narrative, representation and audience through a range of different texts such as TV crime dramas, film posters and adverts. You will be assessed on your ability to analyse a range of media texts using media language, considering the audience and media industries. You will also plan ideas for creating your own media products which will be assessed as coursework in which you create the film marketing for a brief set by the exam board each year.

Course content includes:

- GCSE students will be required to study the marketing and promotion for the Bond film franchise. You will not watch any scenes from the films themselves in order to make a bigger distinction between Media Studies and Film Studies.
- There is a historical dimension to film study, with students studying set media products such as a Quality Street ad from the 1950s or The Man with the Golden Gun poster from 1960s.
- 'Non-examination assessment' worth 30% of the overall course grade in which students can produce print-based marketing material for a new film in line with a specified brief set each year by the exam board.
- Students will need to learn case studies set by the exam board from the following media forms: newspapers and radio considering the representation of events such as coverage of Brexit in the British press in 2019;, advertising and video games considering the representation of

gender, magazines and music videos considering the representation of ethnicities.

- Students will also need to learn more in-depth case studies from television crime drama and music videos, taking into account 2 contemporary artists and one from the 1980s. Students will also need to analyse the online, social and participatory media to see how star personas are manufactured in the music industry.
- Students will be expected to recognize the multi-media platform of contemporary media with the increase of producers having an online presence and social media platforms.

Is the course for me?

You must already be good at and enjoy English to be successful at this subject. It involves similar skills of analysis and interpretation, writing well structured, detailed essay responses to questions and being creative enough to develop your own narratives and ideas. You will need to apply a wide range of subject-specific terminology and theory in relation to the case studies you learn. Therefore, the ability to be organised by keeping detailed notes, to work at a consistently high standard and to be able to meet deadlines is also essential because this course has a coursework component.

For more information see Miss M Goodhew

Contact: mgoodhew@opgs.org

MUSIC

Subject Leader Music: Miss E Bates

Exam Board: Edexcel 1MU0

The main object of the course is to stimulate and develop an appreciation and enjoyment of all types of music through an active involvement in the essential musical activities of appraising, performing and composing.

COMPONENT 1: PERFORMING MUSIC – 30% of total marks

Students must perform twice: once as a solo performance, the second time as part of an ensemble. Each performance must be longer than 1 minute and total more than 4 minutes. Performances will be recorded and marked by the centre and sent to the exam board for moderation.

COMPONENT 2: COMPOSING MUSIC – 30% of total marks

Students must create 2 compositions, totalling at least 3 minutes duration. Each composition must be 1 minute minimum. Students are allowed to use any genre of music for one composition, while the other will be written to a brief given by the board at the start of Year 11. These need to be presented as a score with a recording, and will be marked by the centre and sent to the examining board for moderation.

COMPONENT 3: LISTENING AND APPRAISING – 40% of total marks

Assessment is through a terminal examination marked by Edexcel examiners. Students respond to questions based on short musical excerpts drawing on music from Set Works

which students will study over the two years. Questions will be a combination of objective tests, structured responses and extended responses. Students learn about a wide range of music from the past 400 years, covering Instrumental and Vocal genres, as well as Music for Stage and Screen and Fusions of genres. Through their exploration of these Set Works, candidates will develop an understanding of the organisation of sound.

Expectations:

Approximately grade 2/3 or above performance standard at the start of Year 10 (to be at least Grade 4/5 standard by Year 11)
All candidates should maintain regular instrumental/vocal tuition
All GCSE candidates are expected to take part in the musical life on the school, including extra-curricular Music clubs

As music is a performing art, you should be prepared to be involved in practical music-making and you need to be broadminded in your approach. The commitment involved in this course goes well beyond the scheduled class lessons. The first year of the course will build on knowledge gained in Key Stage 3 and include elements of the syllabus in order to form an effective start to the course.

PHYSICAL EDUCATION

Director of Sport: Mr R Raye

Exam Board: AQA

www.aqa.org.uk/subjects/physical-education

What will I learn?

GCSE specifications in Physical Education should equip students with the knowledge, understanding, skills and values to develop and maintain their performance in physical activities and understand the benefits to health, fitness and well-being. This will require them to:

- develop theoretical knowledge and understanding of the factors that underpin physical activity and sport and use this knowledge to improve performance
- understand how the physiological and psychological state affects performance in physical activity and sport
- perform effectively in different physical activities by developing skills and techniques and selecting and using tactics, strategies and/or compositional ideas
- develop their ability to analyse and evaluate to improve performance in physical activity and sport
- understand the contribution which physical activity and sport make to health, fitness and well-being
- understand key socio-cultural influences which can affect people's involvement in physical activity and sport

How will I be assessed?

The GCSE course is assessed over two units.

Unit 1: - The Theory of Physical Education - 60% of the Final Mark

Two externally marked Written Examination Papers.

Paper 1 (1 hour 15 minutes, 78 marks- 30% of GCSE):

- Applied Anatomy and Physiology – Musculo-Skeletal System/Cardio-Respiratory System, long term and short term effects of exercise and anaerobic/aerobic exercise

- Movement analysis – Lever systems, Planes and Axes of movement
- Physical Training – Health and Fitness, Components of Fitness, Testing, Training Principles, Training methods, Training sessions, Injuries
- Use of Data – Data Collection, Presentation of Data, Analysis and Evaluation of Data

Paper 2 (1 hour 15 minutes, 78 marks- 30% of GCSE):

- Sports Psychology- Classification of Skills, Goal Setting & SMART Targets, Basic Information Processing, Guidance and Feedback on Performance, Mental Preparation for Performance.
- Socio-Cultural Influences – Social Groups, Commercialisation, Ethical Issues
- Health, Fitness and Well-Being – Why we do exercise, Sedentary Lifestyles, Energy, Diet

Unit 2: - Performance in Physical Education – 40% of the Final Mark

Assessed in:

Practical Sports Performance (30% of GCSE)

- Practical performance in THREE different physical activities in the role of player/performer (one in a team activity, one in an individual activity and a third in either a team or in an individual activity).
- Part 1- 5 core skills assessed in conditioned practices
- Part 2- Application of these skills to a fully competitive performance.

Analysis of Performance (10% GCSE)

- Students will be assessed on their analysis (15 marks) and evaluation (10 marks) of performance to bring about improvement in one activity.

PARENTS INFORMATION EVENING:

Following confirmation of your son's place on the GCSE Physical Education course, an information evening will be held during Term 6 of Year 9 (date to follow). The evening will provide both students and parents with the following information, in preparation for the start of the course in September:

- An outline of course content & structure
- Course expectations and lesson protocols
- Practical sports performance- selection of your three sports
- Explanation of the assessment process
- Sports specific assessment days & the potential associated costs
- Requirements for filming of offsite activities & exemplar videos
- An opportunity to purchase GCSE PE course wear
- An opportunity to purchase the following support materials:
 - o 'The Everlearner' online resource
 - o GCSE PE Textbook
 - o Revision Guide
 - o Revision Cards

Contact: r.rraye@opgs.org

PSYCHOLOGY

Subject Leader Psychology: Mr P Sheehan
Exam Board: AQA

Psychology is the scientific study of the human mind and behaviour. You should study psychology if you are interested in yourself and other people. It will also teach you how to think scientifically. Psychology is about helping people and you will study treatments and therapies, as well as what psychologists have found out about the brain and behaviour.

The good news is that this will be a new subject for you so you will not have to know any psychology! Your own experiences will have taught you something about people, and how individuals and groups function. You will need to be willing to develop a wide range of skills: scientific investigative skills, numeracy and literacy, but above all, a curiosity about people's behaviour and an open mind. Psychology is by no means an easy option and students will have to be able to read quantities of text and write accurately and concisely.

The course will be assessed through two written examinations at the end of Year 11.

The course content includes:

- An understanding of biological concepts in psychology, including neuroscience and genetics as contributors to behaviour
- An understanding of thought, information and mental processing as contributors to behaviour
- An understanding of the social area of psychology, the impact of social and environmental factors on behaviour and the influence of groups
- An understanding of how individuals change throughout their lives, with a particular focus on childhood and how both nature and nurture can affect individuals

Students will also gain an in-depth knowledge and understanding of how psychological concepts can be studied, and what the advantages and disadvantages of different research methods are. Be prepared to carry out some practical investigations of your own too.

The programme of study for the GCSE includes the following:

- Memory – how memories can be stored, retrieved, forgotten and changed!
- Perception – why do we see illusions, and how do we make sense of the visual information we receive?
- Development – how babies develop their ability to understand the world around them, and how we develop the ability to learn
- Social Influence – why do we obey and conform to others' ideas, even if we don't agree?
- Language, thought and communication – what does your body language say about you? How does language influence the way we think?
- The brain and neuropsychology – How does the brain work and how does the structure of the brain affect behaviour?
- Psychological Problems – How can we explain and treat mental health issues such as depression and addiction?

The course has been chosen so that it complements the A Level specification, but does not teach the material in the same depth. This means that GCSE Psychology is a 'stand-alone' course and is not a requirement of entry onto the A Level course.

RELIGIOUS STUDIES

Subject Leader RS: Miss L Trumper
Syllabus Name: EdExcel Religious Studies

Course content: All students will study a full course GCSE in Religious Studies.

Syllabus Content:

Paper 1: Area of Study 1 - Religion and Ethics

Students must study all four content sections based upon the religion of **Christianity**
Christian Beliefs, Marriage and the Family, Living the Christian Life, Matters of Life and Death

Paper 2: Area of Study 2 - Religion, Peace and Conflict

Students must study all four content sections based upon the religion of **Islam**
Muslim Beliefs, Crime and Punishment, Living the Muslim Life, Peace and Conflict

The school is required legally to provide R.S throughout the school and so consequently it is better to pursue a full GCSE which is more beneficial to the students than following a course with no accreditation.

All eight units of the two examination papers will be covered in years 10 and 11.

Assessment:

- There is **no** controlled assessment for RS. Two examinations are taken for this GCSE.
- Each unit/exam is worth 50 per cent of the total GCSE marks.
- Each unit/exam is assessed through a 1 hour 45 minute examination, divided into four sections.
- Each question is divided into four parts with each part increasing in difficulty.
- The total number of raw marks for each paper is 118.

SCIENCE

Subject Leader of Science: Miss R. Limer

Subject Leader Biology: Miss M. Knight

Subject Leader Chemistry: Mrs S. Love

Subject Leader Physics: Mr T. Hoskins

Examination Board: AQA

Students can opt to take Triple Science, worth three GCSEs or Trilogy (Double) Science worth 2 GCSEs. Trilogy students will have 9 lessons per fortnight, split between Biology, Chemistry and Physics. Triple candidates will have 14 lessons per fortnight, split between Biology, Chemistry and Physics. Each Science discipline is taught by a specialist teacher.

The aims of the courses are to:

- develop scientific knowledge and conceptual understanding of chemistry, physics and biology;
- develop understanding of the nature and methods of the scientific process;
- develop and learn to apply observational, practical, modelling, enquiry and problem-solving skills, both in the laboratory, in the field and in other learning environments;
- develop the ability to evaluate claims through critical analysis of the methodology, evidence and conclusions, both qualitatively and quantitatively.

The specifications allow students to demonstrate their knowledge and understanding of the content, including in associated mathematical and practical skills. There is overlap between the Triple and Trilogy courses, both courses

following the same outline, although the content for Trilogy is much reduced.

Assessment

A range of question types will be used, including multiple choice, short answer and those that require extended responses. Extended response questions will allow students to demonstrate their ability to construct and develop a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. Extended responses may be in written English, extended calculations, or a combination of both, as appropriate to the question.

Assessment takes place at the end of the course and provides options to suit our learners, including multiple choice and written questions, as well as a practical assessment. This broadens opportunities for students to demonstrate their learning. Learners will sit 2 exam papers for each science.

sllove@opgs.org (Subject Leader for Chemistry)

thoskins@opgs.org (Subject Leader for Physics)

	Topic Title
GCSE Biology	<ol style="list-style-type: none"> 1. Cell biology 2. Organisation 3. Infection and response 4. Bioenergetics 5. Homeostasis and response 6. Inheritance, variation and evolution 7. Ecology

	Topic Title
GCSE Physics	<ol style="list-style-type: none"> 1. Forces 2. Energy 3. Waves 4. Electricity 5. Magnetism and electromagnetism 6. Particle model of matter 7. Atomic structure 8. Space physics

	Topic Title
GCSE Chemistry	<ol style="list-style-type: none"> 1. Atomic structure and the periodic table 2. Bonding, structure, and the properties of matter 3. Quantitative chemistry 4. Chemical changes 5. Energy changes 6. The rate and extent of chemical change 7. Organic chemistry 8. Chemical analysis 9. Chemistry of the atmosphere 10. Using resources

SPANISH

Subject Leader: F Herrera

Syllabus Name: Eduqas

Overview

In year 9 students have had the opportunity to overview the 12 themes assessed by the exam board at GCSE level. Students have been learning the skills needed for the exams in year 11 as well as studying the foundation content of the specification. Students are asked to produce extended written and spoken language pieces as well as understanding long reading and listening passages based on the basic language introduced for each topic. At the same time, they have to translate long simple texts into Spanish and English.

At the end of the year they have a clear idea of the topics for GCSE and how they will be assessed at the end of year 11. As part of the full GCSE course in year 10 and 11 they will be getting a deeper understanding of the three themes covered by the specification. The three themes are:

1. Identity and culture
2. Local, national (home, charity work, health) international and global areas of interests (charities, health, tourism)
3. Current and future study and employment

Structure of the assessment

Paper 1: Speaking

- Non-exam assessment
- 25% of GCSE

Communicating and interacting effectively in speech for a variety of purposes

Foundation Tier and Higher Tier

The format is the same at Foundation Tier and Higher Tier, but with different stimulus questions, materials and preparation time.

- Role-play
- Photo card
- General conversation

Paper 2: Listening

- Written exam
- 25% of GCSE

Understanding and responding to different types of spoken language

Foundation Tier (40 minutes, 40 marks) and Higher Tier (50 minutes, 50 marks)

Questions in English, to be answered in English or non-verbally, or questions in Spanish, to be answered in Spanish or non-verbally

Paper 3: Reading

- Written exam
- 25% of GCSE

Understanding and responding to different types of written language

Foundation Tier (60 minutes, 60 marks) and Higher Tier (75 minutes, 60 marks)

•Students respond to questions in English, in Spanish or non-verbally and translate from Spanish into English.

Paper 4: Writing

- Written exam
- 25% of GCSE

Communicating effectively in writing for a variety of purposes

Foundation Tier (75 minutes, 50 marks)

Students produce responses to several stimuli including photos, short passages, and translations and structured writing tasks.

Higher Tier (90 minutes, 60 marks)

Students produce several written passages including a structured writing task, an open-ended writing task and translation from English into Spanish.

Contact: fherrera@opgs.org

It is essential for students to discuss their GCSE language choice with their teacher.
